DETAILED ACTION

1. Preliminary amendment received on September 17, 2002 has been acknowledged.

Specification

2. The abstract of the disclosure is objected to because the abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. Correction is required. See MPEP § 608.01(b)

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3627

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al. (6,055,516).

Johnson et al. discloses the claimed method and business application for facilitating the exchange of information (product identification and descriptive information) between vendors and seekers with the steps of: entering vendors' item records as listings in an electronically searchable data structure (col. 3, lines 1-6), searching the data structure on the basis of seeker queries generated by seekers (via database catalog 36) subsequent to matching a seeker's query with listings of one or more vendors making available the identity of the seeker for viewing by the vendors corresponding to the matched listings and making available the identity of the vendors for viewing by the seeker (col. 4, lines 30-50). Johnson et al. ensuring that the vendor's item records are for items appearing in an electronically searchable item catalog (via an order lists 48), ensuring that seeker queries are in respect of items appearing in the item catalog (via electronic sourcing system 5), the step of providing for each vendor to nominate seekers who are not to be granted access to the vendor's records (col. 6, lines 60-67; col. 7, line1-4).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. King, Jr. et al., Geier et al., Foster et al., Call, Perkowski, Johnson et al., are cited as art of interest.
